

Top Ten Reasons

How Registered Dietitians Can Improve the Health of Americans and Save Health Care Dollars

A registered dietitian or "RD" serves as an integral liaison in helping individuals and communities make changes for a healthy delicious diet.

- You have prediabetes and want to stave off diabetes. A registered dietitian
 can change your life by teaching you skills that will help you lose and keep
 off weight and keep diabetes at bay.
- Your community has high levels of obesity. A registered dietitian can
 work with public health, government, school and other local leaders to
 create wellness programs that promote healthful eating and physical
 activity for everyone.

- 3. You are a marketing manager for a large food company and know consumers' preference for good-tasting food that is healthy. A registered dietitian can make the connection and work with your food scientists to develop new products that will be successful in the marketplace.
- 4. You want to improve your performance in sports. A registered dietitian can help you set goals to achieve results whether you're running a marathon, skiing or jogging with your dog.
- 5. You have had gastric bypass surgery. Since your stomach can only manage small servings, it's a challenge to get the right amount of nutrients in your body. A registered dietitian will work with you to develop an eating plan for your new needs.
- 6. You realize you need to feed your family healthier foods but you do not cook. A registered dietitian who has special culinary skills can teach you how to cook in a simple, convenient way.
- 7. Your teenager has issues with food and eating healthfully. A registered dietitian can assist with eating disorders like anorexia, bulimia and overweight issues.
- 8. Your community wants more local foods to be available. A registered dietitian can lead efforts to make sure foods will not only be healthy but also will positively affect the local economy.
- 9. You just had your first child, are concerned the baby is not eating enough and need help and confidence for breastfeeding. A registered dietitian can provide guidance and assurance that you and your infant are getting enough iron, vitamin D, fluoride and B vitamins.
- 10. Your mother, who is increasing in age, wants to stay in her home. A registered dietitian leading a local congregate dining and home delivered meals program can obtain a nutrition screening to make sure this happens.
